If a cosmetic product with the Allergy Seal of Quality is advertised as **"without perfume"** or **"without fragrance"**, it must not contain any natural or synthetic fragrances. No plant extracts may be used for perfuming either.

Cosmetics with the claim **"without colorants"** may not contain any colorants in addition to the 26 compounds and substances listed above.

The Allergy Seal of Quality refers exclusively to allergies and intolerances. It certifies that a product has been tested and verified for its suitability for people with allergies or intolerances.

The manufacturer or retailer determines which products should be certified and has them checked by Service Allergie Suisse SA. Consumers will then find the relevant information both on the product packaging and in the product database at www.service-allergie.ch.
